2 Port Micro Built-on-Cable KVM Switch

StarTech ID: SV221MICRO

Control two PS/2 computers from one console without sacrificing desk space, with the world's smallest KVM switch. StarTech.com's unique Built-on Cable KVM technology makes the PC Switcher the smallest two-port KVM switch ever developed. This zero-footprint switch can be hung or tied up out of the way to free up more desk space. As an extra bonus, the ultra-thin, space-saving KVM cables you need are already attached to the switch, making installation fast and easy.

The PC Switcher uses mouse and keyboard emulation to ensure smooth operation, as well as convenient hot-key commands to make monitoring and using your computers easy. The switch features hot Plug n Play support and supports VGA resolutions up to 2048x1536 @ 60Hz. Since the PC Switcher does not require an external power source, all you need to do is plug it in to your computers for a compact and complete KVM solution.

Applications and Solutions

- > Allows control of 2 computers from 1 user console
- > Perfect for integrating two different enterprise computer systems

Features

The StarTech.com

Advantage:**Support and Resources:** Single point of contact for all your questions; exclusive online tools and free live technical support**Save Time Sourcing:** A complete selection of high-demand and hard-to-find products from one vendor**Best Value:** StarTech.com products offer the best combination of features and price**Exclusive Resources:** Complete product information and tools available at www.startech.com
